

BECOME THE POWER

Rocket fuel your team with drums and rhythm. See your people directly access the total power of true collaboration. Watch your team create shared vision, jettison barriers, and celebrate success. Everyone engages, everyone gets it: every time.

Powerful leadership necessitates the potent skills that are synchronous with team development. All the skills and tools that get success, alignment, depth and winning energy in a team are the tools that cutting edge leaders utilize and deploy. Drumming and rhythm build these skills. It's exciting, it's powerful.

No previous musical experience is necessary; through specialized facilitation, this innovative approach guarantees your team will 'jam!'

PROVEN RESULTS

Teams unify and leadership develops when internal awareness directly changes, yielding new vision and behaviors. What creates this kind of change?

- Experiences that engage leaders/teams on every level - not just mental;
- Experiences that engage as many of the leaders'/teams 5 senses as possible; and,
- Experiences that are novel and access true innovations in thought and behavior.

Rhythm is the experience. In 1665 a Dutch scientist, Christian Huygens, discovered that if 2 pendulum clocks were placed side by side, and the pendulums were swinging at different speeds, by the next day the pendulums would be swinging together in perfect unison.

This describes exactly what happens when leadership/teams engage in rhythm experiences as a part of strategic planning, visioning, or group development.

TOTAL LEARNING

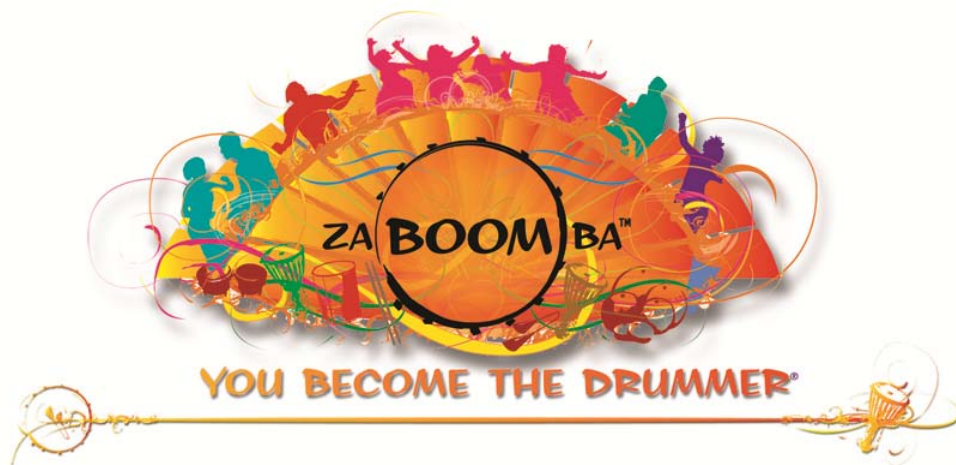

Great organizations take advantage of the fact that the **emotional commitment** is even more powerful than the **rational commitment**, and leads to **total engagement**.

To access this total engagement, Za Boom Ba™ programs are experiential: the team and leadership skill development occurs simultaneously.

Each module provides a multi-faceted approach to anchor learning and make connections through various multi-sensory modalities – experiential, visual, verbal, cognitive, interpersonal, and intrapersonal.

In such a rich context, thinking shifts, and behavior changes.

OPERATIONALIZED OBJECTIVES

We spend considerable consultative time learning about you, your needs and the specifics of the participants and the event. Our facilitators are trained Organizational Development Consultants and bring years of direct field experience to the program. *Every step of the rhythm program maps directly to your group objectives and delivers effective, powerful learning.* And, while each program is aimed at specific skill development, there are overarching objectives inherent in all rhythm sessions.

All Za Boom Ba™ modules deliver:

ENERGY: An energized experience of the power of a team truly working together.

COMMUNICATION: Empowered communication flow - creating effective language for success and unified action, enterprise wide.

DIVERSITY: Respect and integration of diverse perspectives, working styles, cultural norms and each team member's unique contribution.

LEADERSHIP: Leadership skills that promote innovation, engagement, team awareness and the leadership potential in everyone.

WELLNESS: Awareness of the tremendous physical and psycho-social wellness effects of rhythm.

Throughout the process, our facilitators excel at identifying and connecting the learning objectives to the experience.
